Summary

Self-motivated B.Tech graduate in Computer Science Engineering with a strong foundation in data analysis, actionable insight generation and data visualization. Proficient in SQL, Python, and advanced visualization tools like Power BI.

Education

Rajkiya Engineering College, Kannauj (U.P) Degree: Bachelor of Technology (B.Tech.) Computer Science and Engineering CGPA: 7.26	2020 - 2024
Shree H.M.S Inter College, Chitrakoot (U.P) Degree: Senior Secondary 69%	2017 - 2019

Work Experience

Data Analyst Intern TwiLearn EduTech Pvt. Ltd - Cleaned and prepared datasets with over 10,000 rows using Excel, SQL, and Python libraries. - Performed exploratory data analysis (EDA) to identify actionable trends, boosting reporting efficiency by 20%. Developed Power BI dashboards for visualizing KPIs, leading to a 15% improvement in decision-making efficiency.	Sep-Nov 2024
Algorithmic Trading Intern Clever Bharat - Researched and analyzed over 5 years of historical stock data using Python, optimizing trading strategies by 18%. Collaborated with senior traders to refine algorithmic models, reducing execution latency by 12%. - Automated real-time trade execution with APIs, enhancing trading accuracy by 25%.	Sep-2024-Oct 2024
Machine Learning Intern Pantech Pro-labs Pvt. Ltd Preprocessed datasets of 50,000+ rows, achieving a 95% data accuracy rate after cleaning. Implemented SVM and logistic regression algorithms, improving classification accuracy by 10%. Trained machine learning models on diverse datasets, achieving up to 98% accuracy in classification.	Jul-2023-Aug-2023

Projects

Credit Card Transaction Analysis (Excel, PostgreSQL, Power BI) - Used card and treemap to show male user completed 19.2% more transactions, businessmen being the top users in this category and made 8 million more cash transactions than the second-highest user group visualized through stacked bar chart, using map show the location where loan amount is high and digital transactions for bill payments were 40% higher. - Developed an interactive dashboard and data imported from SQL database, to provide real-time insights & Streamlined data processing & analysis to monitor 6+ key performance metrics and trends.	Aug-2024
Blinkit Sales Data Analysis - Performed a detailed analysis of Blinkit's sales, customer satisfaction, and inventory management. Tier 3 outlets sold 20.3% more products than tier 2 outlets, with fruits and vegetables generating the highest revenue across all categories. - According to outlet size medium category outlet generate 14.2% more revenue, and overall average ratings is 3.9.	October-2024

Skills

Languages & Tools: Python, C, C++, SQL **Database:** MySQL, PostgreSQL, Microsoft SQL Serve

Analytical Tools/Skills: Advance Excel, Power BI, Tableau, Google Looker Studio

Machine Learning Library: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Stats-model

Skills: Data analysis, Problem-Solving, Excellent Communication, Leadership

Positions of Responsibility

Student Head Coordinator NSS (National Service Scheme) Led a team of 150+ volunteers across 5 adopted villages, initiating 4 new- community service projects and Served as the primary liaison between college administration and village officials.	April-2023 - May-2024
---	------------------------------

Certifications

- Data Analytics Essential- Cisco Networking Academy
- Tata: Data Visualization Empowering Business with Effective Insights- FORAGE
- SQL(Advanced)- HackerRank

Publication

Driver's Seat Belt Detection Using CNN-SVM: A Hybrid Approach Link	June-2024
